Departure from Oropesa: - Adults: 36€ - Kids (2 to 12 years): 20€

Description:

City that blends harmoniously the remains of the past with the most modern and avant-garde buildings.

We'll start the tour walking through the historical center where we'll start at the Serrano towers. 21 centuries of history, where we'll find some heritage treasures such as the Forsaken Basilica, the Cathedral, the Miguelete Tower, the Central Market (one of the largest markets in Europe that is located inside a pre-modernist wonderful building) and the Lonja (Valencia masterpiece of civil gothic architecture and built in 1482).

After that, free time for lunch (not included).

In the afternoon we'll enjoy a panoramic view of the city, starting at the City Hall square, an eclectic and triangular place with a central fountain surrounded by colorful flower stalls which brightens the landscape. Close to the square we can find some of the most representative monuments of the city as the Post Office, the Bullring, the Railway Station and of course, the City Hall.

After visiting the historic part of the city, we'll approach the twenty-first century Valencia, where we'll see the Palau de la Música and the City of Arts and Sciences which includes some beautiful buildings such as L'Hemisfèric, the Science Museum, the Oceanographic and the Palau de las Arts Reina Sofía.
